DETAILED ACTION

Response to Remarks/Arguments

- 1. In response to communications filed on 10/01/2007, applicant cancels claim 5 and adds claims 9-17. The following claims, claims 1-4 and 6-17, are presented for examination.
- 1.1 Applicant's arguments, pages 8-12, with respect to the rejection of claims
 1-4 and 6-17 have been fully considered but they are moot in view of the new
 ground(s) of rejection.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 8-17, is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter - the claimed subject matter not being tangible. The claimed "encoded ... sequence of programmable instructions" does not define any structural and functional interrelationship between the programmable instructions and other claimed element(s) of a computer, which permit the programmable instructions' functionality to be realized. Such descriptive material does not exhibit any functional interrelationship with the way in which computing processes are performed and is not described as being stored or recorded

Application/Control Number: 10/053,703

Art Unit: 2136

onto some computer-readable medium, thus it does not constitute statutory matter.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims1-4, 6-8 and 12-17 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a client and server machine, does not reasonably provide enablement for a security module. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to understand the invention commensurate in scope with these claims.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chinwendu C. Okoronkwo whose telephone number is (571) 272 2662. The examiner can normally be reached on MWF 9:30 - 7:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nasser Moazzami can be reached on (571) 272 4195.

Art Unit: 2136

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
